HDGFRP2 Antibody

Subcategory: Rabbit Polyclonal Antibody

Cat. No.: 254496 **Unit:** 0.1 mg

Description:

Hepatoma-derived growth factor-related protein 2 (HDGFRP2) is a widely expressed member of protein family that contains the HDGF related proteins 1-4 and lens epithelial derived growth factor (LEDGF). These family members show extensive homology at the amino terminus (termed the hath region). Little is known of the role of HDGFRP2, but like the related LEDGF, HDGFRP2 can bind HIV-1 integrase and stimulate HIV-1 integrase activity in vitro.

Isotype: Rabbit Ig **Applications:** E, WB

Species Reactivity: H, M, R

Format: Each vial contains 0.1 ml IgG in PBS pH 7.4 with 0.02% sodium azide. Antibody was purified by immunogen

affinity chromatography.

Alternate Names: Hepatoma-derived growth factor-related

protein 2; HDGF2; HRP-2 Accession No.: EAW69215

Antigen: KLH-conjugated synthetic peptide encompassing a

sequence within human HDGFRP2.

Application Notes: E: 1:500-1:1,000; WB: 1:100-1:500

Storage: Store at -20°C. Minimize freeze-thaw cycles. Product is guaranteed one year from the date of shipment.

For research use only, not for diagnostic or therapeutic procedures.
