

HSP75 TRAP-1 Antibody

Subcategory: Rabbit Polyclonal Antibody

Cat. No.: 251959

Unit: 0.1 mg

Description:

Heat shock protein 75 kDa, mitochondrial (HSP75 TRAP-1) is a mitochondrial chaperone with ATPase activity. HSP75 TRAP-1 binds to the intracellular domain of tumor necrosis factor type 1 receptor, and also binds to RB1. HSP75 TRAP-1 is expressed in skeletal muscle, liver, heart, brain, kidney, pancreas, lung and placenta.

Isotype: Rabbit Ig

Applications: E, WB

Species Reactivity: H

Format: Each vial contains 0.1 mg IgG in 0.1 ml (1 mg/ml) of PBS pH7.4 with 0.09% sodium azide. Antibody was purified by Protein-G affinity chromatography.

Alternate Names: Heat shock protein 75 kDa, mitochondrial; HSP 75; Tumor necrosis factor type 1 receptor-associated protein; TRAP-1; TNFR-associated protein 1; TRAP1; HSP75

Accession No.: Q12931

Antigen: KLH-conjugated synthetic peptide encompassing a sequence within the N-term region of human HSP75 TRAP-1.

Application Notes: E: 1:10,000-1:50,000; WB: 1:100-1:500

The HSP75 TRAP-1 Antibody is used in Western blot to detect HSP TRAP1 in HepG2 cell lysates.

Storage: Store at -20°C. Minimize freeze-thaw cycles. Product is guaranteed one year from the date of shipment.

For research use only, not for diagnostic or therapeutic procedures.
